

Zeramic Extrem Titanium Plus Antibacterial

Interior-Exterior Antibacterial Thermal Insulation

DESCRIPTION

Zeramic Extrem Titanium Plus Antibacterial, is an elastic membrane, whose application confers the substrate insulating properties, Climalit effect, which turns rooms into a pleasant and sound place. **Zeramic Extrem Titanium Plus Antibacterial** is composed of hollow ceramic microspheres, hollow glass microspheres, silver ions, titanium dioxide and acrylic, elastic and photo cross-linkable emulsions.

Thermal, antibacterial, elastic, anti-crack, breathable and multi-stick product for vertical or horizontal surfaces for interior or exterior use.

Once applied, the result is a continuous, seamless, waterproof, breathable surface prepared to thermally insulate surfaces, either from cold or heat. And simultaneously having substrates protected against contamination produced by fungi, algae and bacteria. It may be applied using a brush, roller or airless spray gun.

The **Zeramic Extrem** product line is based on the technology developed by NASA to clad space shuttles, back in the 70s, to ensure that these shuttles could withstand extreme temperatures when going into space.

TECHNICAL CHARACTERISTICS OF THE PRODUCT

- **Finish:** Smooth matt and white or custom colours for RTS, NCS and Nova colour charts.
- **Density:** 0.866 kg./l.
- **Solids volume:** 72 ±2%.
- **Application temperature:** Between 1°C and 50°C.
- **Yield:** 0.35-0.4 Kg. /m²
- **Dilution and preparation:** dilution 10% water and stir mechanically 2-3 minutes.
- **Pot life:** After the water has been added, 7 days
- **Dry to touch:** approximately 180 minutes for temperatures between 18-20°C (depending on layer thickness).
- **Total drying:** From 72 to 96 hours for substrates with absorption.
- **Methods of application:**
 - **Airless spray gun:** Use conduit nozzle 416-417, remove gun, lung and machine filters and apply between 104 and 120 bars pressure, so as not to rupture the microsphere (adjust the pressure, until not creating application traces)
 - **Manual:** Short-haired roller

TECHNICAL CHARACTERISTICS

- **Temperature resistance:** -10° to 300°C.
- **Zeramic thermal conductivity coefficient:** 0.000125 W/m K
- **Thermodynamic solar opening:** 0.12
- **Solar reflection:** 85.5% ±0,2
- **Emissivity:** 0.76 ±0.3
- **Index for convection coefficients as per ASTM E1980-11 Standard:**
 - Mean of the SRI test 105.26 ±0.3
 - Mean of Ts K test 315.96
- **Surface temperatures under radiation as per UNE-EN ISO 12543-4: 2011 (metal substrate) Standard**
 - -8 Negative degrees (Each degree is equivalent to 6% energy savings)
 - Heat transfer: -60.76 W/m²
- **Reaction to fire as per UNE-EN ISO 11925-2:2011/ UNE-EN 13823:2012 Standard:** B-S1.d0 Fire-retardant.
- **Thermal Insulator:**
 - Reduces the air conditioning (hot-cold) costs by over 45% in interior applications. Prevents the oven effect in summer and thermally insulated from cold in winter, infrared rays reflective.
 - Reduces CO₂ emissions
 - Considerably reduces heating and air conditioning costs, as there are no thermal losses.
- **Accelerated ageing as per UNE-EN 11507 Standard:** Type 1, very light change, barely noticeable.
- **Direct traction adhesion as per UNE-EN 1542: 2000 Standard:**
 - Average 1.87 N/mm²
- **Liquid water permeability as per UNE-EN 1062-3: 2008 Standard:**
 - 0.0235 kg/m².h^{0.5}
- **Water vapour transmission as per UNE-EN ISO 7783: 2012: Standard:**
 - 16.65 V(g/m²x day) and 1.24 S_D(m)
- **Carbon dioxide permeability as per UNE-EN 1062-6: 2003 (Anticarbonation) Standard:** SD (m)=120±15

Revestimientos técnicos Sostenibles s.l.

DATA SHEET

OTHER TECHNICAL CHARACTERISTICS

- Ecological:** Very low VOC content
- Antibacterial:** Product in aqueous dispersion of silver ion particles coated with titanium dioxide. From among its properties:
 - Eliminates 99% of the bacteria which may be on the interior surfaces
 - Eliminates, while preventing the growth of lichens, molds and fungi
 - Neutralises bad smells
- Anti-condensation system:** product which eliminates the thermal bridge by increasing the substrate temperature, therefore, preventing condensation.
- Waterproof:** 100% waterproof product.
- Catalytic photo:** Accelerates photocatalysis and produces negative ions, beneficial for health, while reducing and decanting household dust.
- Acoustic:** dampens impact noise produced by rainwater.

PILOT TEST CERTIFICATE Number 9624-2016

CUSTOMER: REVESTIMIENTOS TÉCNICOS SOSTENIBLES, S.L. (RTS)

ADDRESS: Polígono Industrial El Torno - C/ Alfareros 9. 41710 UTRERA (Sevilla)

TESTED MATERIAL: ZERAMIC Extrem W

PROCEDURE: Pilot Test to define the insulating capacity of material

DATE OF ISSUE OF CERTIFICATE: 20/07/2016

REFERENCE REPORT 7035-2016

It gives off a density applied from this pilot test for average of 467 microns of the product ZERAMIC Extrem W and the environmental conditions registered, it gets a reduction of inner temperature of the cover surface of an industrial warehouse from until 8,00 °C in average and a decrease of heat profit from until 60,76 W/m² on average for a cover of these characteristics.

METHODOLOGY

As the pilot test was done, it's determined the average temperature "in situ" of the treated and untreated surfaces in the building using a thermographic equipment in order to study its performance in the presence of temperature variations and incidence of the solar radiation. The determinations are carried out in the inner surface of the metallic cover (pre-lacquered steel of both sides) of an industrial warehouse where a zone has the applied product and the other one without applying to study the differential performance. The results have been analysed quantitatively to evaluate the effectiveness of lining.

The heat penetrates from outside the cover through two components:
 the heat radiating and the heat transferred by air convection:

$$Q_{tot} = Q_{rad} + Q_{conv} = 4\epsilon\sigma T_m^3 \Delta T_r + h_c \Delta T_a$$

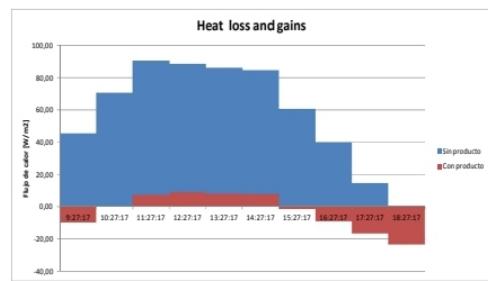

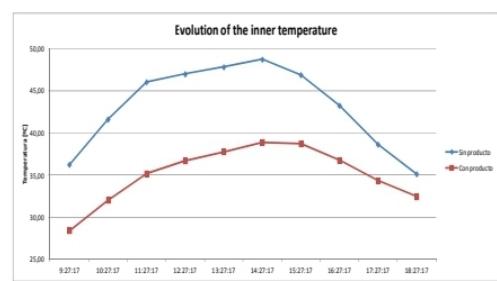

The parameters to calculate the heat flows are deducted in the above equation.

MAXIMUM & MINIMUM VALUES AND AVERAGES

	Inner Temperature [°C]

RESULTS

SOLAR REFLECTANCE

The result of solar reflectance of the test specimen referenced as «ZERAMIC EXTREM W» is:

Solar reflectance (%)	85.5 ± 0.2
-----------------------	-------------------

The following graph shows the data of the spectral reflectance of the test specimen.

TECNALIA | Inspiring Business

EMISSIVITY

The results of emissivity are:

Measurement	1	2	3	4	5	6	7	8	9	10
Emissivity	0.76	0.75	0.75	0.76	0.76	0.77	0.76	0.75	0.75	0.76

Therefore, the mean emissivity value of the test specimen referenced as «**ZERAMIC EXTREM W**» is:

Emissivity	0.76 ± 0.03
------------	--------------------

SRI

Using the solar reflectance and emissivity values obtained, the following **SRI index** and **surface temperature** values are obtained, in accordance with the ASTM E1980-11 Standard for different convection coefficients:

Convective coefficient	SRI	T _s (K)
Low (0-2 m/s)	104.5 ± 0.3	319.5
Medium(2-6 m/s)	105.3 ± 0.3	315.8
High (6-10 m/s)	106.0 ± 0.3	312.6

PACKAGING AND YIELD

Zeramic Extrem Titanium Plus Antibacterial is available in 15L and 4L packs., with maximum yields of 35 m² for 15 L drums and 10 m² for 4 L cans.

APPLICATIONS

Zeramic Extrem Titanium Plus Antibacterial is a coating with extraordinary qualities. It is composed of liquid ceramic microspheres and silver ions, the film, which once dry, allows for uniform, continuous and seamless surfaces. Other noteworthy applications include:

- Elastic, anti-cracking.
- Self-cleaning

APPLICATIONS

- Climate control of dwelling interiors, to reduce between 45-50% the energy costs as regards air conditioning and heating.
- Prevents the sensations of cold feet and hot head, by obtaining a more homogeneous heat distribution
- Create pleasant and sound environments for the health of its occupants.
- Recommended, for allergy sufferers or asthmatics, by not releasing any chemical substance or migrations.
- Ideal product, for nursing homes, nurseries, hospitals, animal farms ...
- Decorative product, can be manufactured in any colour
- Low cost and easy maintenance
- High durability, 10-year warranty (always by technical or project manager requirement)

Revestimientos técnicos Sostenibles s.l.

DATA SHEET

WARRANTY

Zeramic Extrem Titanium Plus has a 10-year warranty depending on substrate and geographic location.

The **Zeramic Extrem Titanium Plus** warranty only applies to the product, so the application must be under warranty by the application company.

In order to request a product warranty, a requirement will be necessary.

PRECAUTIONS

Zeramic Extrem Titanium Plus must not be stored for longer than 1 year, provided that it has been correctly handled, avoiding direct exposure to sun, frost, humidity ...

Empty containers must be deposited at clean points or those prepared for waste. European environmental regulations must be complied with.
